

NOLCP

Important considerations

NOLCP

http://www.cancerresearchuk.org/sites/default/files/national_optimal_lung_pathway_aug_2017.pdf

Local Process Mapping

Primary Care	Access Team	Radiology Admin	Radiologists and reporting radiographers	Respiratory administration / tracking	Respiratory MDT	Cancer tracking team	Data team / coding
CXR referral		Process referral	Hot reporting SWRT				
Information		Book CT / flag capacity	Requesting SOP and flag to cancer team	Flag EGFR requirement		Hold assurance 2ww	Establish code
Reflex referral	NOLCP access mailbox	Patient info / support	Patient info / support				
Discuss 2ww referral with patient	2ww referral	EGFR	Triage Direct access CT	Support patient			Evaluation report
Support patient	2ww receipt gov		Reporting governance	Track CT report			
Further management	Standardised comms	Standardised comms	Comms to GP	Standardised comms	Triage post CT		
DA CT	OPA				OPA	Audit / safety net	

Important considerations

- Bespoke / Local process mapping
- Incorporate existing referral criteria, local policies and processes
- ? Requires adaptation of referral proforma
- Administrative processes required
- Deviations from pathway
- Coding and tracking
- Current management of specific conditions
- Safety net / audit
- Clock start and 2ww receipt / upgrade assurance
- Data collection systems
- Patient support provision / responsibility
- Tariff agreements
- Promotion / education events

Current Alliance work

- Patient information guidance
- Alliance NOLCP generic communications
- Generic high level process mapping
- Support for local bespoke process mapping and SOP development
- CX2 management and protocol development
- Commissioning workstream
- Evaluation report schedule
